

SPRING UPDATE

Construction of KING Toronto has now commenced. We have begun demolition activities on site, and expect to begin shoring later this month, with excavation set to begin this Summer.

- We have selected EllisDon Residential Inc., one of Canada's largest general contractors to construct KING Toronto.
- We have contracted most of our major trades, including numerous firms that have been working with Westbank for over 25 years.
- The inspiration for KING Toronto's unique facade came from the Parisian Maison de Verre (1932), which was one of the first buildings to demonstrate the potential of revolutionary new construction material, including glass blocks. This curtain wall system will be provided by Integro Building Systems, one of Canada's largest curtain wall contractors.
